

# E3 Metals to collaborate with Scovan Engineering on scoping study for the development of its Alberta Petro-Lithium Project

CALGARY, June 20, 2018 /CNW/ - E3 METALS CORP. (TSXV: ETMC) (FSE: OU7A) (OTC: EEMMF) (the "Company" or "E3 Metals") is pleased to announce that the Company has established a cooperative relationship with Calgary based Scovan Engineering Inc. (Scovan) to help advance engineering elements of its Alberta Petro-Lithium Project. This engagement, provided to the Company on a collaborative basis, will include high-level technical scoping of the Project's brine extraction and disposal requirements and of the Company's proprietary lithium concentration technology. The engagement is a result of Scovan's commitment to developing business opportunities and engineering solutions through innovative collaboration. The Company has not entered into any agreements or commitments to award Scovan current or future work.

"E3 Metals is excited to partner with an experienced Calgary based engineering firm to develop innovative design solutions to advance its Petro-Lithium project," stated Chris Doornbos, E3 Metals CEO. "We are committed to engaging with local partners who share our passion and vision for growing Alberta's clean energy economy."

## About Scovan

Scovan is a state-of-the-art engineering firm that specializes in offering innovation and experience for energy related industrial projects by providing engineering, procurement and construction management services. Our team works in harmony to discover new and innovative solutions that enable our clients to excel in the planning and implementation of their developments. It's this open work environment that allows us to obtain outstanding results while delivering value, driving down costs and executing our projects efficiently. Scovan Engineering, moving energy forward.

## About E3 Metals Corp.

E3 Metals is a Petro-Lithium company rapidly advancing the development of direct recovery lithium brine projects in Alberta. E3 Metals holds lithium resources at 6.7 Mt LCE (inferred)<sup>1</sup>. The Company has a compelling competitive advantage by virtue of having access to extensive infrastructure built by the Oil and Gas industry in Alberta. This has provided E3 Metals with low finding costs, as the Company has been able to sample existing wells to define its resource. This infrastructure may also provide wells and pipelines for a future lithium production operation, potentially reducing the Company's future capital requirements. The Company's immediate goal is to demonstrate a commercially viable chemical concentration process and believes this is a key driver to commercial production of its Alberta lithium brine resource. More information about E3 Metals can be found on our website by visiting: [www.e3metalscorp.com](http://www.e3metalscorp.com).

ON BEHALF OF THE BOARD OF DIRECTORS,

Chris Doornbos, President & CEO  
E3 METALS CORP.

Chris Doornbos (P.Geo), CEO and Director of E3 Metals Corp., is a Qualified Person as defined by NI 43-101 and has read and approved the technical information contained in this announcement.

<sup>1</sup> E3 Metals has released information on three 43-101 Technical Reports totalling resource of 6.7 Mt LCE. The Central Clearwater Resource Area (CCRA) Technical Report, identifying 1.9Mt LCE (inferred), is dated effective October 27, 2017, and the North Rocky Resource Area (NRRA) Technical Report was dated effective October 27, 2017, identifies 0.9Mt LCE (inferred). A third report for the Exshaw West Resource Area (EWRA), identifies 3.9Mt LCE (inferred) and was dated effective June 4<sup>th</sup> 2018. All reports are available on SEDAR ([www.sedar.com](http://www.sedar.com)).

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.

This news release includes certain forward-looking statements concerning the potential of the Company's projects to produce saleable lithium byproducts, including LCE, the future performance of our business, its operations and its financial performance and condition, as well as management's objectives, strategies, beliefs and intentions. Forward-looking statements are frequently identified by such words as "may", "will", "plan", "expect", "anticipate", "estimate", "intend" and similar words referring to future events and results. Forward-looking statements are based on the current opinions and expectations of management. All forward-looking information is inherently uncertain and subject to a variety of assumptions, risks and uncertainties, including the speculative nature of mineral exploration and development, fluctuating commodity prices, the effectiveness and feasibility of emerging lithium extraction technologies which have not yet been tested or proven on a commercial scale or on the Company's brine, competitive risks and the availability of financing, as described in more detail in our recent securities filings available at [www.sedar.com](http://www.sedar.com). Actual events or results may differ materially from those projected in the forward-looking statements and we caution against placing undue reliance thereon. We assume no obligation to revise or update these forward-looking statements except as required by applicable law.
