About E3 Metals Corp.

E3 Metals is a lithium development company with 6.7 million tonnes lithium carbonate equivalent (LCE) inferred mineral resources¹ in Alberta. E3 Metals is currently advancing its proprietary Ion Exchange Direct Lithium Extraction Process (DLE Process) in partnership with Livent Corporation under a Joint Development Agreement. Livent is the world’s largest pure-play lithium producer, well-known for being one of the lowest cost producers of lithium carbonate. With facilities across the globe, Livent holds technical expertise in the extraction and production of various lithium products. E3 Metals also continues to work with partners at the University of Alberta and at GreenCentre Canada.

Through the successful scale up its DLE Process towards commercialization, E3 Metals plans to quickly move towards the production of high purity, battery grade, lithium products. With a significant lithium resource and innovative technology solutions, E3 Metals has the potential to deliver lithium to market from one of the best jurisdictions in the world. The development of this lithium resource through brine production is a well-understood venture in Alberta, where this brine is currently being produced to surface through an extensive existing oil and gas infrastructure and development.
